Continue to improve attention to detail for call-outs. Attendance not only includes business meetings, but trainings and call-outs. The Posse has had to turn down two call-outs recently due to lack of responders. The May 19th call-out had 13 Posse members respond. Fire was able to contain the fire, so it was stood down. Our new Deputy was thankful for the team members who responded. The check-list for Sartopo call-outs has changed. Find new list on JP website. Changes include: starting tracks a few miles from home, instead of when leaving. Make sure to have correct maps downloaded on Sartopo. Start with first initial, last name and date when starting track. Starlink has been activated and was used at the last Tech Thursday training. Directions for starting Starlink will be in FCV. Currently there are 5 team members who have the power to activate it when needed. The grant money has arrived and equipment ordered. 24 handi-talkies, 12 iPad mini's, and stand alone APRS's with antenna. All property of YCSO. Will need to be signed out. Must keep all boxes and pieces for return when leaving the team. If equipment is broken, return everything and will be reported. Radios will have second battery which will not be YCSO property. Wanting more joint team trainings with other teams. June training is with SDU. New Deputy, Agundez Esdras (Ezra), Frank34, 760-960-8348. His information is in VR.. At the overhead meeting, we do not have medical direction, only allowed to help in our scope of training. Be sure to look at ASARCA training list to see what you need to be call-out qualified.
